AMENDMENTS TO THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1. (Currently amended) A method for removing transfer resistant make-up compositions comprising the step of applying a safe and effective amount of a make-up removing composition comprising:
 - (i) from about 0.1 to about 30% of a non-spherical crosslinked siloxane elastomer said elastomer having a particle size of from above 10 to about 200 microns;
 - (ii) from about 10 to about 80% of a solvent suitable for topical application to the skin having a solubility parameter of less than or equal to about 9 (cal/cm³)^{1/2}; and
 - (iii) optionally, from about 0% to about 90% water; and;
 - (iv) an emulsifierwherein the composition has a viscosity greater than about 20,000 cps.
2. (Original) The method of Claim 1 wherein the transfer resistant make-up is silicone gum or resin based.
3. (Original) The method of Claim 2 wherein the make-up removing composition further comprises a skin conditioning agent.
4. (Original) The method of Claim 1 wherein the skin conditioning agent is selected from the group consisting of humectants, exfoliants, emollients and mixtures thereof.
5. (Original) The method of Claim 4 wherein the skin conditioning agent is a humectant.
6. (Original) The method of Claim 5 wherein the humectant is selected from the group consisting of propylene glycol, dipropylene glycol, polypropylene glycol,

polyethylene glycol, sorbitol, hydroxypropyl sorbitol, hexylene glycol, glycerin, 1,3-butylene glycol, 1,2,6-hexanetriol, ethoxylated glycerin, propoxylated glycerin and mixtures thereof.

7. (Canceled)
8. (Currently Amended) The method of Claim 7 1 wherein the emulsifier is polyoxyalkylene copolymer.
9. (Original) The method of Claim 8 wherein the polyoxyalkylene copolymer is dimethicone copolyol.
10. (Previously presented) The method of Claim 1 wherein the crosslinked siloxane elastomer is a mixture of non-emulsifying and emulsifying crosslinked siloxane elastomers.
11. (Previously presented) The method of Claim 1 wherein makeup removing compositions further comprises an active selected from the group consisting of peptides, palmitoyl-oligopeptide, farnesol, bisabolol, phytantriol, glycerol, urea, guanidine, ascorbic acid, vitamin A, vitamin E, vitamin B₃, vitamin B₅, sunscreens, anti-acne medicaments; antioxidants, flavonoids, skin soothing and healing agents, chelators, sequestrants, opacifiers and mixtures thereof.
12. (Currently amended) A cosmetic removing wipe, comprising:
 - A. one or more layers of water-insoluble substrate; and
 - B. a safe and effective amount of a make-up removing composition comprising;
 - (i) from about 0.1 to about 30% of a non-spherical crosslinked siloxane elastomer said elastomer having a particle size of from above 10 to about 200 microns;

- (ii) from about 10 to about 80% of a solvent suitable for topical application to the skin having a solubility parameter of less than or equal to about 9 (cal./cm³)^{1/2}; ~~and~~
 - (iii) optionally, from about 0% to about 90% water and;
 - (iv) an emulsifier
- wherein the composition has a viscosity greater than about 20,000 cps.
